# Sivaranjani S

## PHP Developer

Dedicated PHP Developer with 6+ years of hands-on experience crafting robust and scalable web applications. Proficient in leading PHP frameworks, including Laravel and WordPress, to deliver innovative solutions that meet clients' needs.

Adept at creating seamless user experiences through expert use of HTML, CSS, Bootstrap, AJAX, jQuery, and JavaScript.

## Experience

### 2021-Current

IXLY Technologies | Coimbatore

### Senior PHP Developer

- Developed server-side and client-side code for various projects using Laravel, HTML, CSS, and JavaScript technologies.
- Conducted research, testing, and implementation of client feature requests, successfully delivering internal content management systems and content delivery applications.
- I have configured and deployed existing and future APIs, seamlessly integrating third-party APIs to facilitate payment integration.
- Expertly installed required plugins and performed additional coding to align with WordPress projects' final design and functionality specifications.
- Designed responsive, mobile-first websites, starting from design concepts to ensure an optimal user experience.

### Notable Projects:

- **Peenie Wallie Jamaica:** Created a virtual market e-commerce website allowing customers to sell and purchase products online, developed using WordPress.
  - [View Project](#) (Technologies: WordPress, jQuery)
- **Stock Market Mantra:** Developed trading guidance software leveraging AngularJS and Laravel framework, integrated with Pusher for real-time chat functionality. Interfaced with external APIs to provide valuable insights to traders and investors.
  - [View Project](#) (Technologies: Laravel, AngularJS, Pusher, jQuery, AJAX)
- **MarkHamlin:** Designed and launched a comprehensive profile website for Doctor Mark Hamlin, allowing visitors to access appointment details and other relevant information.
  - [View Project](#) (Technologies: WordPress, jQuery)
- **Stimclex:** Created an interactive platform to help nursing students practice for their National Boards Exam, utilizing WordPress and jQuery.
  - [View Project](#) (Technologies: WordPress, jQuery)
- **Ogburn Online School:** Developed an informative online school website detailing the institution's offerings and enabling student admissions through an online enrollment form.
  - [View Project](#) (Technologies: WordPress, jQuery)
- **Hireandmove:** Designed and developed a comprehensive online platform for a moving company, providing users with a seamless and efficient experience for relocating their belongings. The website serves as a user-friendly interface for customers to access the company's services, facilitating the entire moving process from planning to execution.
  - [View Project](#) (Technologies: WordPress, jQuery)

## 2019-2020

Bluekode Solutions | Coimbatore

### PHP Developer

- Facilitated effective communication between clients and the team by conveying project changes and updates.
- Developed server-side and client-side code for various projects, utilizing PHP, HTML, CSS, and JavaScript to deliver robust solutions.
- Successfully managed projects, including the development and maintenance of Murai Sweets, an online sweet purchasing website, where I implemented features for order management and customer data storage using technologies such as Core PHP, AJAX, jQuery, HTML, and CSS. You can explore the project at (<https://www.murarisweets.com/>).

## 2018-2019

UITOUX Solutions | Coimbatore

### PHP Developer

- Developed back-end components to establish seamless connections between applications and web services.
- Planned the complete lifecycle of web-based applications, from conceptualization and coding to deployment, leveraging PHP, MySQL, and JavaScript.
- Successfully managed diverse projects, including:
  - **PIAS**: A web application focused on inventory management, enabling efficient stock detail maintenance.
  - **MPOS**: A web application product facilitating stock orders with PayPal payment gateway integration and meticulous order tracking.
  - **Partsmart**: A web application product dedicated to vehicle parts management, encompassing detailed part inventories.
- **Technologies**: Laravel, AJAX, jQuery, HTML, and CSS to achieve project goals.

## 2014-2017

Rayaz Technologies | Madurai

### PHP Developer

- Conceptualized and executed website development projects, utilizing HTML, CSS, and Bootstrap to bring initial concepts to life.
- Planned the end-to-end development of web-based applications, meticulously planning, coding, and deploying solutions powered by PHP, MySQL, and JavaScript.
- Successfully delivered a project for Suhail Group, where I designed and developed their company website using WordPress, enhancing their online presence. You can visit the website at (<https://suhailgroup.com/>).
- **Technologies**: WordPress, jQuery, HTML, CSS, and Bootstrap, to achieve project objectives.

## 2014 (Jan-Oct)
